

News 03/2022 - Pushover

Push messages with HCC as of Version 4.3.0

- Receive alarms and events as push messages directly to the smartphone
- In addition or as an alternative to e-mail notification
- Compatible with iOS and Android

The configuration succeeds in a few steps in a few minutes

Register with the Pushover internet service and test it free of charge for 30 days.

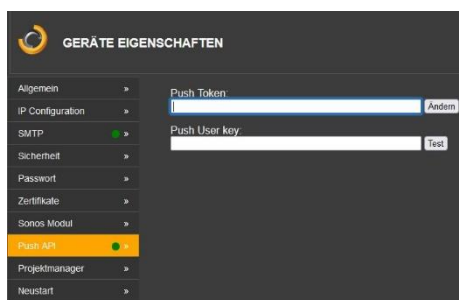

Create an API token for the HCC on the Pushover page

HCC (Application)

API Token/Key [\(Edit or Delete Application\)](#)

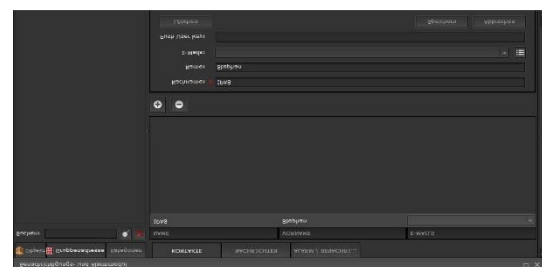

To begin using our API to send notifications, use this application's API token:

aqpsvmqd9b3bqpp784be6d6x18msfz

Enter the user and API token in the config.php of the HCC

Configure push messages for events and alarms in the HCC Editor

Ready, test, go...
